updates on the insane world of money and power

*A Look Back In Anger—At Covid*

What was it we were told about the virus? If we got the 'vaccine' we could not get the infection. The 'vaccine' would prevent transmission. The 'vaccine' would be localized—confined to that area of the arm 'jabbed'. The 'vaccine' would neither affect menstrual cycles nor cause blood clots or myocarditis. Masking everyone, combined with 'social distancing' and 'lockdowns', would impede the spread of the virus, leading to herd immunity. Children were at risk from the virus and needed to be 'vaccinated'. And, strict precautions and protocols were needed because this virus spread asymptotically.

Those with natural immunity, having fought-off the virus, needed to be immunized. Adverse reactions to the 'vaccines' were few. The VAERS reporting system, created by the health agencies, they referred to as unreliable. And, the ability of health agencies to get the virus effectively under control was being undercut by scientists and medical professionals questioning 'established narrative experts' from the CDC, FDA, and NIH.

Which promises on the list were broken, and what on the above list was in-fact, untrue? *If we got the 'vaccines' we could not get the infection./The 'vaccine' would prevent viral transmission.* If either were true there would be no need for masking, social distancing, or 'lockdowns'. Australia 'locked-down' everyone, and now the island is overrun with a mutated-variant, with severe infections reported in the 'vaccinated'.

Both the infection and transmission' statements, were false. A K-12, adjacent school study, in Fargo, ND, found higher infection numbers in the school with mask mandates than in the unmasked school. And, with almost 3 years of data behind us, peer-reviewed studies indicate that pathogens found inside masks are much worse than those clinging to the outside of masks. Studies confirm that those at risk should avoid masks.

Nevertheless, in the face of mounting evidence, San Diego schools are back to masking children, dismissing studies that show kids to be more at risk from mask pathology than from the virus. And, LA County is ready to re-institute indoor masking. Germany is preparing to re-mask—for an anticipated onslaught of infections in the fall—more rules made around stargazing. Masks, social distancing, and 'lockdowns' are found to be medically inefficacious, begging the question: are they there to control? Reinstallation of failed masking protocols in the wake of solid testing denying their value clearly shows that facts don't matter. These rules are about obedience and 'surveillance'—with 'watchful' only 1 part—now we get the 'Minority Report'—'predictive'.

Joseph Biden assured us that Covid spread was a *pandemic of the un'vaccinated'*—which studies now show to be untrue. Naturally acquired antibodies were dismissed by the 'elite', but peer-reviewed studies now show that the 'vaccinated' have 13X the risk of being infected with a SARS 2 variant, than those with acquired natural immunity.

But that won't stop dictators who are not listening to facts. Only 2% of young children are vaxxed, but the plan is to vax them all—relying on dictates from non-practicing, medical spokespersons pushing for mandates to vaccinate kids, without doing trials, and, or, consulting their own panels of experts—while expressly censoring dissent. And, knowing the range of 'jab' efficacy for kids falls between negative to a plus 4%, and that the 'vaccines' hold more risks for children than the virus, they approve them.

As agency spokespersons begin to back off from the 'fraud' perpetrated through misrepresentation of data and made-up promises (reminding us there were many 'grey' areas in the science), they fail to mention that they used extreme measures to silence the best and the brightest in the medical community from any meaningful debate.

These 'vaccines' had 'emergency use authorization', and, if 'in use' drugs could be shown to combat the virus, 'emergency status' would be removed. So the agencies told us that 'vaccines' had been approved when they were not. Without emergency authorization, there are only 2 approved 'vaccines', and neither of them is approved for young children—and there are no 'boosters'. Try finding that fact on corporate media.

As a result, there are many dedicated scientists and doctors in the health agencies who, in frustration, have resigned because they could not bring themselves to approve 'vaccines', without supporting data. And, rendering the situation as heinous, science fiction, Deborah Birx, White House COVID 19 Coordinator, in a memoir and subsequent interviews, has allegedly revealed that working with Anthony Fauci, without a viable database, they rationalized the use of masks, social distancing, and lockdowns.

She purportedly admits to editing (doctoring) information, in an attempt to have it appear favorable before it went to the president. Hearing these reports, one has to ask if Deborah Birx is the product of 'tyranny through agency'. Does this cross the 'self-appointed hubris' line—and rather than being bold, is she seditious and utterly stupid?

Prolonged use of masks for anyone (especially kids) is a medical threat, and 'vaccine mandates' have the potential to show themselves to be global genocide. Lockdowns drove humanity to the brink of madness, destroying means to support families.

Vaccinated people are now more likely to be hospitalized or die from Covid, according to official government estimates from the Canadian province of Manitoba. In May, only 9 percent of Covid deaths and 14 percent of hospital admissions in Manitoba occurred among unvaccinated people, even though they are 17 percent of the population.

This is 1 study among many that go unmentioned by the authorities. Still, the elite are on the run: NYT allegedly had to retract published numbers of child Covid deaths, from 900,000 to 63,000—deaths likely not caused by Covid, but from 'all cause' mortality. Hospitalized kids were tested, and if asymptomatic positive, Covid killed them?

Are the elite building a climate of fear by misrepresenting the danger so that people get 'vaccinated'? This battle for our freedom, against viral mandates, is not over until it's over, and the elite are fighting to the last, at all costs, using all means. So must we.

I didn't make it through my opening list, so I'll soldier on with this tomorrow. My fiction can be read at [neverhadaboss.com](http://neverhadaboss.com).
