updates on the insane world of money and power

*Losing the Republic—Block by Block*

The surprise winner of the Dutch election, Geert Wilder, in his 1st speech to the nation, and the EU, offered an indictment that Europe was being assimilated into a 'migrant culture'—not the other way around. Many urban areas of Europe are becoming dangerously unavailable for non-migrants—including police. Public services, postal, ambulance, fire, risk their lives entering migrant barrios. For the same reason US Cavalry would not enter Comanche territory—EU police do not enter migrant-controlled areas.

Wilder's warning, coupled with a high birth rate among immigrants, portends an end to Europe as we knew it, pointing to eventual takeover of Europe as a Muslim region.

We don't have to look back far to remember when Europeans were convinced to have less children—to reduce CO2 (global warming). Now, all that is forgotten, instead propaganda supports the need for 'population replacement'—an actual UN department.

Without discussion of 'excess deaths' (allegedly 'vaccine' related)—'unvaccinated' migrants, sharing few common values with existing populations. are being groomed for entry into EU/US military service, in a process where they will be granted citizenship.

US military recruiting numbers are way down, not only because there is an aversion to serving in the military among young males but because of antipathy towards serving a foreign policy that seeks to subject the world to US 'rules-based order. Because woke males are not prime candidates for military service, Senator Dick Durban, along with his cohorts, seek to fill the ranks with 'migrant replacements: 'If illegals can pass reduced mental and physical standards, they can join the military and become citizens.'

In preparation for this article, I researched 'excess deaths' in the US—described as 'missing Americans'. I bring this up to shine a light on evil elites and an obtuse 100 million Americans, unaware of disappearing great swaths of our population. And how the avoidance of facts lends itself conveniently—to the idea of 'population replacement'.

Long articles regarding 'excessive deaths' (that only lately make the news), reference Covid, 'baby-boomers', and for whatever reason—'structural racism'. But nowhere is mentioned, 'vaccines'. The numbers show the US 'die off' to be greater than peer nations, and don't account for the fact that most of the deaths are among caucasians, with a large percentage under 60 years of age. The facts are avoided on purpose.

Americans are in the dark about the 'migrant invasion'. To get a shot of adrenaline up your spine, visit last week's HighWire and listen-in to an interview with Michael Yon,

who spends his time in the 'Darian Gap', Central/South America/China, to understand the infrastructure and funding behind 10/20 million migrants besieging our border.

Texas finds itself in a worse situation than colonies under England. Funded by US NGOs, through the UN, migrant buses travel through Central America without stopping, waved through at each of 5 borders, to Mexico. What about the Mexican border? Do they turn back migrants from 121 countries? No, they allow them to continue their pilgrimage to the US border—unquestioned. Where is the Mexican border immigration?

Biden was a strong advocate of border control when he was a US Senator. He criticized Trump for 5 million immigrant encounters over 4 years. Biden's had 12 million in 3 years, to bring in 20 million new voters, 'pledging allegiance' to the left for opening the doors for them, assuring that 'globalist/socialists' will never again lose an election.

Most US leaders, now assisting illegal immigration, previously spoke out against it. In a world so divided by ideology, religion, and politics, to assume that 10/20 million migrants will improve the US, politically/economically is such a monstrous bet to make.

We are a nation of immigrants—but what we are experiencing now has no order to it—and is better described as 'unvetted chaos', with a question: who are these 'migrants'?

Migrants from the Americas are mostly young men, but include substantial numbers of women and children. These migrants are open to talking about the reasons they are headed north. But those from other parts of the world will not. Especially Chinese, military-age men, without women and children, are unwilling to engage in conversation about how they got here, or why they are migrating. Do they come with a mission?

Migrants from outside the Americas (especially Chinese) do not trek the dangerous Darien Gap—they take a boat from Columbia. Camps, such as San Vicente, are strictly Chinese camps. Now, many fly to Canada, from where they walk across a long border.

There is coordinated action to integrate 'illegal migrants' into the workforce, bringing great deprivation to working-class Americans. 'Illegal migrants' are given 'perks', not available to the general population. They go to college with no 'out of state' fees. Banks cannot consider 'illegal status' when they apply for a loan. And, across the nation, citizens are being displaced to make habitat space for 'illegals'. All is taxpayer-funded.

The madness persists in 'sanctuary cities', with taxpayers funding illegals. Because 'illegals' have taken precedence over citizens, when funding is no longer available to support the migrant onslaught—what will the government do to continue with its plan?

Consider 2030—'you will own nothing and be happy'. The thing that makes life worth living is an 'inalienable right' to private property. To have the ability to say this is my land—this is my home. I alone decide who is welcome at my home—and who is not.

What happens when the dollar can no longer fund the madness of illegal (government supported), migration? Will draconian laws be passed giving migrants the right to 'legally' share our homes, based on a 'socialist equity' notion—conducted at gunpoint?

Yesterday, I watched a best friend, 60 years old, who experienced what he described as a mini-stroke shortly after receiving the 'vaccine'. Now, a 'blood clot' in his neck, caused a massive stroke. As a result, he has no motor-function except movement of his eyes. His energy and goodwill were boundless, and soon, he will pass from this life.

There was no talk at the hospital about mRNA—far from it. Is it coincidence that my friend is now a cipher in 'population replacement'? Or, is his fate no coincidence at all?

They are coming—block by block. Neither is a cul-de-sac nor any high ground, safe. Get my articles by email with a request: erik@neverhadaboss.com. And thank you
