updates on the insane world of money and power

*When Did We Vote for an Un-Elected Fed, CDC, FDA, FBI, HS, CIA, WEF?*

If you have a question about how agencies gained control over our lives, there's a simple explanation: once a body politic has been dumbed-down as to the facts, it reacts purely in terms of emotion. For example, the governor's race in Oregon: amongst 3 female candidate, 1 of them, an independent, pulls enough votes from democrats that the republican has a toss-up chance of winning (not seen since the neolithic age). Leaving 'leftist' ideologues paralyzed—unwilling to discuss issues other than abortion.

Americans are beyond fed up with authorities (often unelected), controlling our lives. If the republican wins in Oregon, it will not be decided over abortion—it will be decided by voters who either know someone injured by 'vaccines', or. who lost jobs/businesses to tyrannical, un-elected, health agency dictates that attacked 'inalienable rights'.

Oregon's is the most egregious of many state ballot measures in direct opposition to a recent SC ruling, affirming the right to 'keep and bear arms'. Asking 'leftists' if they support the measure, they do. They have no problem with someone needing 'permission' to own a firearm. The obvious question escapes them: permission from whom?

They don't get it that across the world citizens are recoiling from 'Pfizer fraud'. European nations are demanding their 'vaccine' dollars back from Pharma. New York and Alberta have made rulings that anyone who was dismissed for refusing to have an 'experiment' jabbed into their bodies get their jobs back with backpay. The new Alberta Premier apologized, while denouncing illegal billionaire WEF mandates for Canadians.

The ideologues I talk to are out-of-control. They abruptly comment whenever their emotions get the best of them, and they back away emotionally when something gets brought up that threatens the 'narrative'. For instance, I ask if when they talk to friends about the midterms, do they weigh candidates platforms against one another? And do they discuss 'ballot measures' in terms of constitutionality/illegality? They do neither.

Somehow billionaires and agencies assume they control our lives. The FBI 'brass' recently had to remind agents that the 1st and 4th Amendments exist. And WEF added to its 2030 lunacy: citizens (which citizens?), without a specific permit, will be limited to drive only within the area in which they live, using prescribed routes and destinations, though prescribed routes may be longer/take more time. Also, all airports are to close.

Many families lost love ones to consequences of the virus because hospitals took away 'all' treatment options. How many patients were put on remdesivir (against the

family's wishes), and forcefully kept off ivermectin and hydroxychloroquine because remdesivir was the only accepted protocol? Who decided that pharmacies would not fill prescriptions from doctors—for common drugs? And, who authorized a massive payment system for hospitals that only prescribed remdesivir—failing that—ventilators?

How far up the 'food chain' do we have to go to find those who knew remdesivir to be a failed ebola drug that allegedly killed half of patients in trials—more fatal than ebola? And, when used in tandem with ventilators, raised the mortality rate to 90% And who decided that hospitals, in which patients could not be treated with protocols prescribed by the patient's doctor—were neither visitable nor free to leave a hospital to go home?

Agencies did that, with powers vested in them by legislators. And, if ever there was an example of absolute power corrupting 'absolutely', look no further than health agencies. Originally charged with a mandate to inform Americans, they instead became cheerleaders for medical 'rackets'. Only a voter groundswell can put a stop to this.

It is apparent that all elite decision-making is ideologically motivated. As with 'vaccine' mandates, which, in retrospect were not medical decisions—but 'politics for profit'. Has anyone failed to notice that little kids, hardly susceptible to the virus have been herded by health regulator deciders that unanimously voted for mRNA 'vaccines' as protocol to attend school. And NO MORE FREEBIES. Reportedly, kids will have to pay for the jabs—jabs that for unspecified reasons have been raised in price—400%.

But what about the recoil from growing awareness of 'severe adverse reactions' and 'excessive death rates'—polls show that of those who took the 'jabs/boosters', only 1 in 3 would reportedly have taken the 'jabs' had they known then what they know now.

We hear plenty about authoritarian systems—Russia and China (China, yes—Russia no—read Putin's latest speech). But what about the tyrannical takeover of the US by those that talk a 'good democracy' while putting the boot on American and global necks. What about Biden and Co., grasping power, ignoring 'due process/rule of law'?

In my view, each agency in my title is constitutionally illegal and represents a 'thievery' of powers, purposefully mandated to American citizens. How did that happen? Americans have been propagandized into accepting that they can't survive without dependence on the elite. To that end they give over the Bill of Rights and the Constitution.

But the elite have taken it too far and here comes that recoil—the backlash that will show itself in the midterms. I can't say for sure that Oregonians will go republican, but one of the 'bluest' states, just being up for grabs, is a terrifying prospect for 'globalists'.

Unelected and unconstitutional bureaucracies first gained control of our economies, politics, now our bodies. From where do they get their authority? Who voted for an illegal Fed, for Bernanke, backed by Yellen and all the mid-wits? Who invited them into the Constitution, and where was a president with the guts to fire J. Edgar Hoover on day 1? Think about trouble we could have been spared, had the FBI been reeled-in.

The power vested in the Fed is illegal and criminal. Same with the FDA and CDC. Authority, given to the FBI, Homeland Security, and CIA, is not based on American security concerns. Instead, each is a 'rogue agency'—in direct defiance of the Bill of Rights. And there is no concern for actual Americans in the economy. This latest BS of melding the Fed with Treasury is a stupid game of juggling worthless treasuries with almost worthless treasuries. All that's left is to kick a full #10 can—barefoot. It's over.
